DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 15-34, drawn to a method for routing data packets, classified in class 370, subclass 352.
 - II. Claims 7-14, drawn to establishing connection/session, classified in class 709, subclass 227.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions discloses:

Group I discloses a method for routing data packets.

Group II discloses a method for registering a cable modem with a cable modem terminal system.
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to David Fogg on July 30th, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2616
